Professional Summary

Frontend developer building and maintaining web applications using React, JavaScript, and TypeScript. Experience working with Firebase for authentication, database management, and subscription-based access control in live production projects.

Swedish citizen currently based in Tbilisi, Georgia, with a background in electrical infrastructure and SaaS environments, bringing structured problem-solving and strong communication skills into software development.

Projects

Georgian Language Learning Platform – georgianlanguage.online

Founder & Full-Stack Developer

Designed and developed a subscription-based language learning platform built with React and TypeScript.

Implemented Firebase (Authentication, Firestore, Storage, Hosting) to manage users and secure lesson access.

Integrated Dodo Payments with webhook handling to automate recurring subscriptions and control premium content access.

Developed protected routes and structured access logic based on user subscription status.

Continuously expand the platform with new lessons, quizzes, and interactive learning tools.

Amindi24 – amindi24.ge

Frontend Developer

Built a real-time weather platform delivering localized forecasts through external weather API integration.

Structured asynchronous data handling and optimized rendering for performance.

Implemented caching logic to reduce unnecessary API calls and improve loading speed.

Designed a responsive interface focused on clarity and fast access to weather information.

Young Scientists – youngscientists.ge

Frontend Developer

Developed an informational platform supporting academic and scientific initiatives.

Designed structured, content-focused layouts emphasizing readability and accessibility.

Implemented responsive design to ensure usability across devices and organized content architecture for maintainability and future expansion.

Nordic-EL – nordic-el.se

Frontend Developer

Designed and developed a professional website for a Swedish electrical installation company.

Built a responsive, SEO-conscious interface using semantic HTML, CSS, and JavaScript.

Implemented a structured contact form to streamline inquiries and lead generation.

Deployed and maintained via Netlify with performance optimization.

Experience

High Voltage Electrician – Kraftringen Service AB, Hässleholm, Sweden

December 2021 – January 2025

Performed maintenance and new construction of overhead and underground power lines.

Installed and maintained transformers, cables, and electrical systems while ensuring strict safety standards.

Customer Success Agent – Visma SPCS, Växjö, Sweden

May 2019 – November 2020

Provided technical and product support for payroll and accounting software.

Maintained high customer satisfaction while identifying upsell opportunities.

Account Manager – Eniro AB Sweden, Växjö, Sweden

October 2017 – April 2019

Sold digital marketing solutions including SEO and paid advertising.

Promoted from retention to new business sales within four months.

Customer Support Technician – Webhelp Nordic (Canal Digital), Kalmar, Sweden

September 2016 – September 2017

Provided technical troubleshooting and customer support, specializing in retention and contract renewals.

Service Technician – Avent, Kalmar/Nybro, Sweden

January 2015 – December 2016

Installed and serviced ventilation systems and electrical components for corporate and private clients.

Education
