Tbilisi, GE | LinkedIn | Portfolio | Github| me@hampuslang.com

WORK EXPERIENCE

Georgian Language Online **Tbilisi**
Full-Stack Developer *2025 - Present*

- Designed and developed a subscription-based language learning platform using React and TypeScript, serving real users in production
- Implemented Firebase (Authentication, Firestore, Storage, Hosting) to manage user data and secure access to premium content
- Integrated Dodo Payments with webhook automation to handle recurring subscriptions and dynamically control user access
- Built protected routing and role-based access logic to differentiate free vs. paid user experiences
- Continuously expanded platform features, including interactive lessons, quizzes, and gamified learning systems

Freelance / Client Projects **Remote**
iGaming Affiliate & SEO Developer *2026 - Present*

- Built and maintained iGaming affiliate websites for clients using WordPress, custom Gutenberg themes, reusable components, custom post types, ACF-powered content structures, comparison pages, and scalable site architectures
- Planned and implemented SEO strategies covering keyword research, on-page SEO, technical SEO, internal linking, redirects, indexing, content structure, Google Search Console, Rank Math, and ranking improvements
- Integrated affiliate, tracking, and third-party APIs, including Trackbox-style workflows, to automate offers, tracking links, casino and sportsbook data, and dynamic website content
- Built a custom affiliate-management platform for a client so they could manage their affiliate business, website data, offers, tracking, and day-to-day operations from one system
- Managed WordPress setup, plugin configuration and integrations, hosting, migrations, bulk content imports, redirects, Rank Math, Search Console issues, PageSpeed optimization, mobile UX, updates, and technical troubleshooting across multiple affiliate websites

Kraftringen Service AB **Hässleholm, Sweden**
High Voltage Electrician *2021 – 2025*

- Performed maintenance and construction of overhead and underground power lines
- Installed and maintained transformers, cables, and electrical systems following strict safety standards
- Diagnosed and resolved electrical faults to ensure system reliability and uptime
- Worked in high-risk environments requiring precision, compliance, and technical problem-solving

Visma SPCS **Växjö, Sweden**
Customer Success Agent *2019 – 2021*

- Provided technical support for payroll and accounting software to a large customer base
- Resolved complex product issues while maintaining high customer satisfaction
- Identified upsell opportunities and contributed to increased customer retention
- Communicated technical concepts clearly to non-technical users

Eniro AB **Växjö, Sweden**
Account Manager *2017 – 2019*

- Sold digital marketing services including SEO and paid advertising solutions
- Promoted from retention to new business sales within four months based on performance
- Managed client relationships and optimized campaigns to improve results
- Consistently met and exceeded sales targets

Webhelp Nordic **Kalmar, Sweden**
Customer Support Technician *2016 – 2017*
- Provided technical troubleshooting and customer support for TV and internet services
- Specialized in customer retention and contract renewals
- Diagnosed technical issues and guided users through solutions
- Maintained high service quality in a fast-paced environment

Avent **Kalmar, Sweden**
Service Technician *2015 – 2016*
- Installed and serviced ventilation systems and electrical components
- Worked with both private and corporate clients on-site
- Ensured systems met safety and performance standards
- Performed troubleshooting and maintenance to extend system lifespan

Freelance Web Development Projects

Young Scientists (youngscientists.ge)
